## WHAT YOU NEED TO KNOW:

The choices you make when you shop do not just affect you...

\* Palm oil (or palmitate) is found in MANY foods and products, including frozen dinners, low-fat dairy, cookies, soap and cosmetics!

\* When palm oil is produced NON-sustainably, thousands of orangutans perish each year, due to clear-cutting of rainforests, and uncontrolled burns. Orangutans and many other species face extinction in 10 years or less if we don't do something.

\* **Boycotting all palm oil is not the solution.** When palm oil is produced sustainably, it is very important to the livelihood of millions of people in Borneo and Sumatra.

\* Almost all of these companies are members of the RSPO (Roundtable for Sustainable Palm Oil), however there is no actual proof that these companies are using sustainable yield palm oil due to the lack of a certification system.

\* **Please write to the companies on this list...** and encourage them to add to their product labels that they are using sustainable yield palm oil or sustainable yield Palmitate.

\* This is a 'fluid' list. Hopefully many more companies will be switching to palm oil grown through sustainable practices that do not threaten the survival of orangutans, rhinos, elephants, tigers and *many* other species.

\* If you have information that other companies are using only sustainable yield palm oil in their products, please forward that information to: [palmoil@cmzoo.org](mailto:palmoil@cmzoo.org)
